

Upcoming important deprecations

in Microsoft Power Platform

4 CHANGES TO CHECK IN YOUR TENANT

Dataverse for Teams

New environments stop; upgrades need planning.

15 NOV 2026

Creation ends

Unmanaged developer environments

Developer Plan provisioning ends. Creation limit: 3 to 1.

15 NOV 2026

Provisioning ends

App Builder + vibe.powerapps.com

Migrate the apps you want to keep.

30 NOV 2026

Retirement

Seeded AI Builder credits

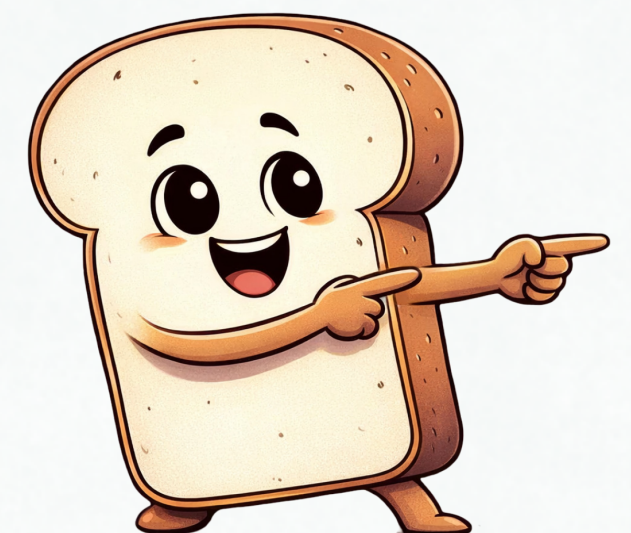

Removed from new and renewed eligible licenses.

01 NOV 2026

Entitlement change

**Check the dates. Keep the work.
Plan the cost.**

Swipe for impact, next steps and references.

Dataverse for Teams is being retired

Plan the upgrade before access is suspended.

15 Nov 2026

New environment creation ends

15 Sep 2027

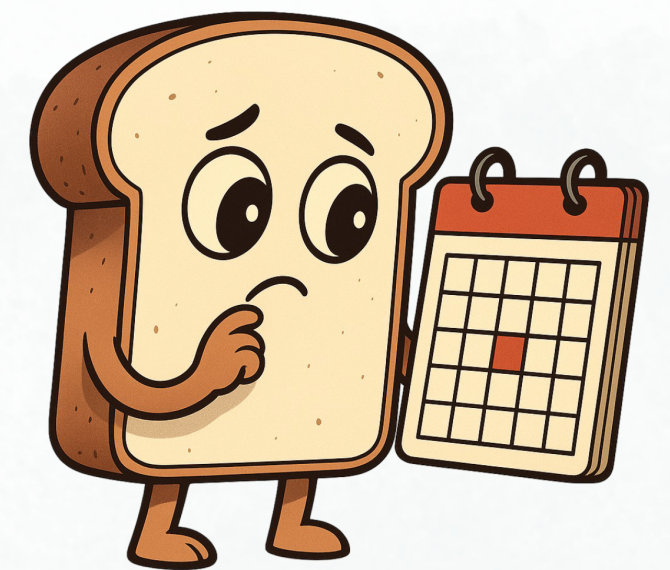

Unupgraded environments suspended

30 Oct 2027

Unupgraded environments decommissioned

WHAT IT MEANS

Suspension removes access to apps, flows, agents and data. Upgrading to full Dataverse keeps those resources, but needs tenant capacity and the right Power Platform licenses.

WHAT I WOULD CHECK

Filter **Type = Microsoft Teams** in the admin center. Plan upgrades before **15 Sep 2027** to avoid interruption.

Developer environments: managed becomes the path

The free Developer Plan provisioning route is ending.

15 Nov 2026

New unmanaged creation
ends

15 Dec 2026

Suspension starts

15 Jan 2027

Deletion starts

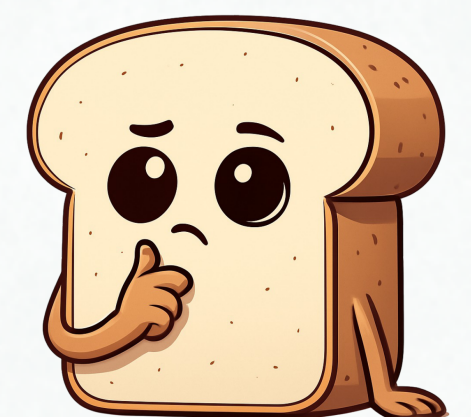

3 to 1

CREATION LIMIT PER USER

One managed developer environment going forward.
Existing managed environments stay, even if you have several.

THE LICENSING DETAIL

The free Developer Plan has no Managed Environments use rights. Running apps and flows there needs appropriate premium licensing.

WHAT I WOULD CHECK

Filter **Type = Developer** and **Managed = No**. Convert with suitable licensing or move your work before **15 Dec 2026**.

App Builder agent + vibe.powerapps.com

Existing apps need a migration plan.

Mid-October 2026

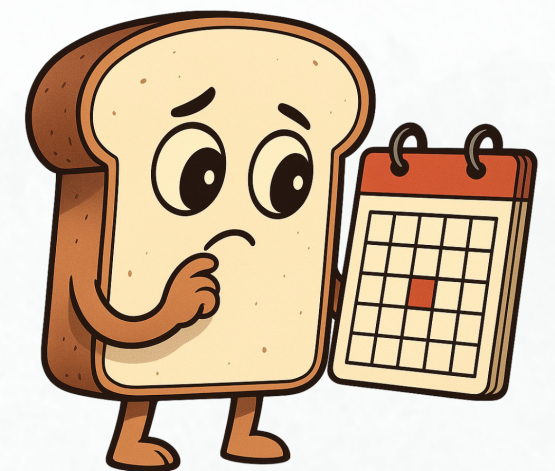

New app creation ends;
migration scheduled to open

30 November 2026

Both experiences retire

WHAT IT MEANS

MC1505609 says apps left unmigrated become inaccessible through the retired experiences. Check migration availability in your tenant.

Migrate apps to **Code Apps** or **Copilot Managed Runtime**.

WHAT I WOULD CHECK

Identify apps to keep using **Power Platform Inventory** (Manage > Inventory).
Choose the migration path and complete it before **30 Nov 2026**.

AI Builder: seeded credits are ending

Power Apps / Power Automate Premium are affected.

From 1 Nov 2026

No seeded credits on new
or renewed eligible licenses

Until contract end

Existing seeded entitlements
continue

WHAT IT MEANS

AI Builder features continue. In Power Apps and Power Automate, AI Builder credits are used first, then Copilot Credits. Without either, runs can be blocked.

WHAT I WOULD CHECK

Check contract end dates, monthly usage and Copilot Credit capacity. Budget using the rates for your actual AI Builder workloads.
